

Full Stack Developer

Location	Remote	Employment type	Full Time
Travel	0-25%	Position type	Salary

We are seeking an experienced, talented, self-motivated full stack software engineer who has a successful track record utilizing JavaScript, HTML5, CSS3, C# and .NET Core along with exposure to various backend development technologies. As the Full Stack Software Engineer, you will have the opportunity to make a major impact on the technical direction of our Labor Management System, working directly with our senior developers to improve the core functionality and add new features to our product. This role is ideal for candidates who love exposure to the entire product development cycle.

Responsibilities

- Develop well designed and efficient code
- Integrate data from various back-end services and databases
- Work to improve existing code base as required

Qualifications

- Bachelor's or Master's degree in Computer Science or equivalent industry experience
- 3+ years of experience designing and developing software in a full stack capacity
- 3+ years programming skills in C#, Java or C++
- Experience developing applications hosted on Azure, AWS or other similar Cloud Platforms
- Worked with cloud technologies, SQL, NoSQL, Microservices, ML, or AI
- Strong experience with JavaScript/TypeScript and VueJS or other JavaScript frameworks
- Knowledge and experience with .NET Core
- Strong technical problem solving and debugging capability
- Experience in Agile and DevOps development methodologies
- Good written and verbal communication skills
- The ability to multi-task while balancing short-term and long-term tasks is essential

Note

Ability to meet Next View Software and customer security screening requirements may be required for this role. These requirements include but are not limited to the following specialized security screenings: Next View Cloud Background Check, which candidate must pass upon hire and every two years thereafter.
